UNDERSTANDING GLOVE MARKINGS

EN 388 - This standard applies to all kinds of protective gloves giving protection from mechanical risks, in respect of physical problems caused by abrasion, blade cut, puncture or tearing. This standard also covers risk of electrostatic discharge.

EN 374 - This standard specifies the capability of gloves to protect the user against chemicals and/or micro-organisms.

EN 511 - This standard applies to gloves which protect the hands against convective and contact cold.

EN 407 - This standard specifies thermal performance for protective gloves against heat and/or fire.

EN 659 - This standard defines performance requirements for gloves designed to protect fire fighters against heat and flames.

EN 421 - This standard lays down test methods and performance criteria for gloves offering protection against ionising radiation and radioactive contamination.

If a glove is to be used for food handling, it is required to carry either the words: 'For Food Use' or this symbol.

**Mechanical Hazards
EN 388**

Performance Level

(a) Abrasion Resistance	0 - 4
(b) Blade-Cut Resistance	0 - 5
(c) Tear Resistance	0 - 4
